

RGCPs - what we are

- **RPIF branch in central Arizona:** One in a global network of 17 RPIFs
- **Planetary image and data archive:**
 - **Photographic collections:** Lunar Orbiter, Apollo, Mariner 9, Viking, Voyager, Magellan, Galileo
 - **Digital collections:** Galileo at Jupiter, Mars Express HRSC, and more
 - **Unique collections:** Terrestrial aerial photographs, lava tube database, Planetary Aeolian Laboratory experiment records
 - **Planetary library:** Maps, books, and journals
- **Planetary Geographic Information Systems (GIS) Laboratory**
- **Darkroom facility:** Digital and wet print processing

RGCPs - what we do

- **Archive planetary images and data**
- **Support ASU faculty, students, and the planetary community in:**
 - Planetary mapping
 - Digital image processing
 - Retrieving digital planetary data
 - Planetary research
- **Produce monthly planetary image press releases**

- **Community outreach**
 - Design and host **summer day camp** for middle school students
 - Participate in **ASU and community outreach events** including Earth & Space Exploration Day, Night of the Open Door, and more
 - Present public **space science talks**
 - Produce and distribute **planetary posters**
 - Design **exhibits and displays** for ASU Libraries and outreach events
 - Coordinate training and use of **STARLAB**
 - Lead **school group tours***

*Please contact us to schedule tours for groups exceeding 5 people
